

PAULI & CO[®] | pure

Operating manual

Scope of delivery & components

On/off switch, pull cord, USB-C charge port with integrated LG 6,400 mAh lithium-ion battery, illuminating ring, mounting rings for installation with snap hooks

Charging devices:

The PAULI & CO® | pure is compatible with standard USB chargers, e.g. from your smartphone or tablet. Please ensure the charger complies with the following technical specifications: Input: 100-240 V – max. 50/60 Hz 0.8 A, Output: max. 12 V 1 A

Installation options

Ceiling attachment Door clamp Tripod Wall attachment

Pull the cable through the middle of the spring. Please ensure that it is not twisted and runs in a straight line onto the lower snap hook. Please also make sure that the bows on the sleeve are not tied too tightly.

The motorised hammock can be fixed onto a ceiling hook (with extension chain if required), a door clamp, a tripod or a wall attachment. Please install the motor as shown.

Minimum height above the ground: 55 cm

GROUND

Set-up

It takes just a few steps to set up your PAULI & CO® | pure motor.

The motor is delivered with a battery level of 20 % – please fully charge the motor prior to first use if possible. Alternatively, you can also charge it while in use.

Simply install it as shown on page 3, between the 1st and 2nd snap hooks, above the spring.

The PAULI & CO® | pure cannot be operated together with a swivel, as this can cause the pull cable to become twisted.

1

Download the app

Download the PAULI & CO® | pure app from the Apple App Store or the Google Play Store and connect the app to the motor.

2

Switch on the motor

Press the on/off switch. A light will circle the motor. The light will then shine continuously to indicate standby mode.

Light signals:

Start:	light circles around the motor twice
Standby & operation:	light shines continuously
Fault:	light flashes red, then shines red
Bluetooth connection interrupted:	a darker-coloured light will circle around the motor
Change of mode:	flashing light

You can choose from 16 million different colours in the app and change the colour as often as you like.

3

Lay your child in the hammock

- 3-7 kg with PAULI & CO premature baby spring
- 6-12 kg with PAULI & CO baby spring
- Maximum weight: 15 kg

4

Set the time and press Start

Set the desired rocking time (operating time) and the speed and then press Start. You can adjust both the rocking time and the speed during operation. You do not need to rock the hammock – the motor will cause it to sway automatically.

PLEASE NOTE: If the Bluetooth connection between the motor and phone is interrupted, the set programme will continue until it completes.

Please note: It is not possible to change the settings for 2 seconds after adjusting the time and intensity. This is to ensure smooth operation.

Do not leave your child unattended in the hammock!

5

or

Stop

If you wish to stop operation, simply press Stop in the app, or press the on/off switch on the motor.

Disposal

Here at PAULI & CO we do everything that we can to avoid the use of plastics. As such, our products are only ever packaged in paper and cardboard. Please dispose of the packaging correctly in your paper recycling bin.

The motor consists of a battery, various electronic components, metal and biopolymer. Please dispose of the motor at your local electronic device (WEEE) disposal point or return it to us by following the instructions at pauliundco.de. It is NOT permitted to dispose of waste electrical and electronic equipment alongside domestic waste in the European Union.

Warranty

The PAULI & CO® | pure motor comes with a statutory two-year warranty. Please contact the retailer for more information. This warranty covers all defects caused by faults with the materials, processing or construction. The warranty does not cover natural wear and tear, incorrect maintenance or improper use.

Service

If you require any assistance or additional product information for your PAULI & CO® | pure motor, then please contact us on info@pauliundco.de. We treat all enquiries with strict confidentiality.

General safety information

WARNING

- Do not leave your child unattended in the hammock!
- The motor will only function when your baby is placed in the hammock. There is a minimum weight requirement of 3 kg, so the hammock can be used even with small babies.
- The motor can be combined with hammocks from other manufacturers. Please adhere to the respective minimum distance from the ground. This is at least 55 cm for PAULI & CO hammocks. This safety distance applies to products from PAULI & CO and to many similar products from other manufacturers.
- The motor features a safety cut-out. This will operate if, for example, a sibling pulls on the hammock. The motor will pause and you will receive a push notification via the app. The motor will also give, off a light signal.
- Simply turn the motor off when it is no longer required. Once the set time has elapsed, the motor will switch to standby mode and will then automatically switch itself off after a few minutes.
- Ensure that the charging cable doesn't hang down onto the hammock. Make sure, you affix it beyond the reach of your child.
- Do not use the motor if it has been dropped or has fallen to the ground. Please send it back to PAULI & CO to be checked.

We value your opinion!

We hope that you appreciate the quality of our products and that they make your day-to-day life easier. If you are happy with our products, please leave us a Google review or leave a comment on one of our social media channels. We are really grateful for all positive feedback.

If you are not fully satisfied, please get in touch.
We can almost always come up with a solution!
